Code of Conduct

Please be aware the freedesktop.org Code of Conduct applies to projects it hosts, including the drm subsystem, igt, maintainer tools, etc:

<https://www.freedesktop.org/wiki/CodeOfConduct/>

Please be aware also the kernel.org Code of Conduct applies to kernel development:

<https://www.kernel.org/code-of-conduct.html>

See the kernel MAINTAINERS file for contact details of the drm maintainers.

Abuse of commit rights, like engaging in commit fights or willfully pushing patches that violate the documented merge criteria or process, will also be handled through the Code of Conduct enforcement process. Violations may lead to temporary or permanent account or commit rights suspension according to freedesktop.org umbrella rules.
